

embracing creative dialogue

# INTRO DUCTION

*Excellent craftsmanship  
and timeless design*

First launched in 2004, the CHAT BOARD® magnetic and writable glass solutions have long since become modern Danish design classics of international recognition. Each piece in our continually growing collection of products has been specially developed to encourage and facilitate creative dialogue and the exchange of ideas in the modern workplace or domestic setting, combining function and aesthetics with uncompromising quality.

At CHAT BOARD® we are proud to carry on the Scandinavian tradition of excellent craftsmanship and timeless design, always aiming to represent the best alternative in terms of quality, design, flexibility and service.

With a wide selection of products, in a choice of 35 unique colours, we are able to meet almost all requirements at short notice. Moreover, at CHAT BOARD® we welcome a challenge and are always happy to help create bespoke proposals for each individual project, whatever the size and scale. Working closely with interior designers and architects, we have developed and produced tailor-made solutions for a long list of high-profile clients all over the world.

We are proud to count some of the most iconic companies among our regular customers, and we honour their trust in us by always striving for the excellence they have come to expect from the CHAT BOARD® brand.

TECHNICAL  
INFORMATION

45

# WALL

## *Classic*

CHAT BOARD® Classic inspires and facilitates creative dialogue between people and minds. Specially designed to help generate, visualise, organise and exchange ideas and information, it provides the perfect finishing touch in any office-, meeting- or breakout space. The design is sleekly elegant and deceptively simple; each element has a clear function and nothing is superfluous. And the smooth, magnetic glass surface offers the most satisfying writing- and drawing experience you'll ever have.

For technical information see page 46

## *Matt*

CHAT BOARD® Matt, like its glossier counterpart Classic, is the ideal tool for illustrating, sharing and communicating creative ideas and thoughts. What really sets it apart is the elegantly matt, yet velvety smooth, surface, which ensures minimal reflection or glare. Equally easy to clean and maintain, it will remain a pleasure to use and look at for years to come.

*Mix and match with  
Classic, Matt & Buzzifelt*

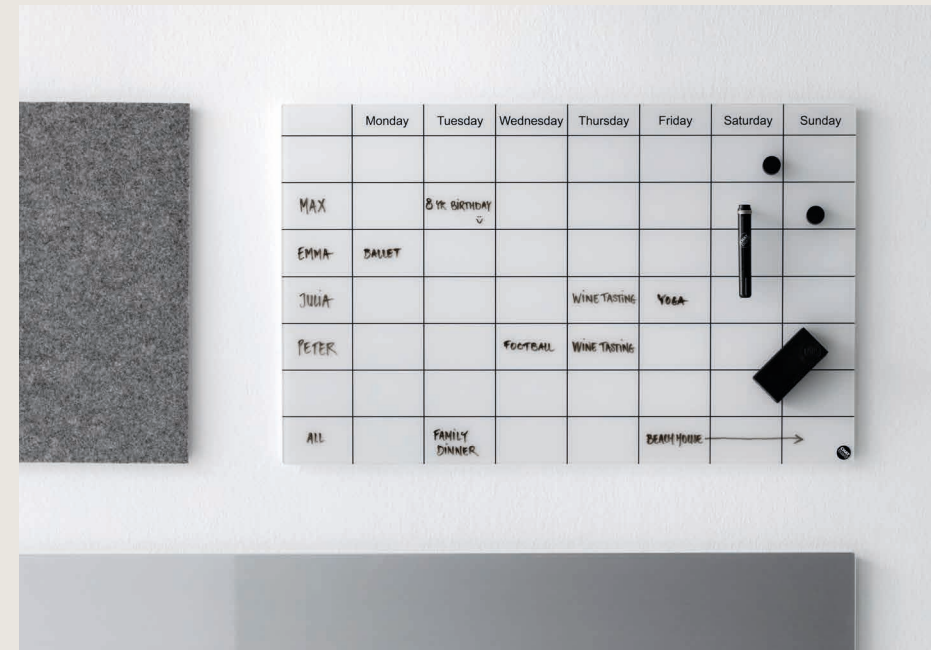

## BuzziFelt

CHAT BOARD® BuzziFelt is our magnetic, felt-covered pinboard. Doubling up as a sound-dampening panel it is the ideal companion for any of our glass boards. Combined with e.g. CHAT BOARD® Classic or Matt, they can turn any office wall into an ultra-functional, multi-textured and dynamic surface.

## Planner

CHAT BOARD® Planner is the perfect analogue planning tool for the office or home. With a „built-in“, digitally printed weekly or yearly planner grid, according to preference, it makes it both easy and fun to share and coordinate upcoming events, make a note of dates to remember and get a common overview of current and future plans.

# FREESTANDING

## *Mobile*

CHAT BOARD® Mobile provides the ultimate, multi-purpose solution for the dynamic workplace. With its ingenious design, sturdy construction and ultra-stable, yet easily movable, steel base it is virtually impossible to overturn, meaning there is plenty of room to get carried away in the creative process. Besides boasting one of our signature writable, magnetic glass boards on the front, the Mobile can also be fitted with a sound-dampening BuzziFelt pin board, or an additional magnetic glass panel, on the back.

For technical information see page 48

### *Move*

CHAT BOARD® Move seamlessly combines our signature magnetic and writable glass board with a class A acoustic panel in a movable room divider in this unique design by ARDE design studio. Perfectly finished in Remix wool fabric by Kvadrat and featuring an ingenious, "stackable" cross-base, which allows you to store several units in even the smallest space, Move offers style as well as substance without compromising on either.

*Perfectly finished in  
Remix wool fabric  
by Kvadrat*

For technical information see page 49

## *Introducing* **CAVE**

The streamlined design, clear functionality and tactile surfaces make CAVE, as well as Sketch Board, a true pleasure to use.

## **PORTABLE** *CAVE & Sketch Board*

Designed by SALTO & SIGSGAARD, in accordance with the distinctive aesthetic guidelines of our signature boards, but in a handy, lightweight and user-friendly format, the CHAT BOARD® Sketch Board is the personal board for sketches, notes and ideas. In meetings or moments of contemplation, it is the ideal alternative to a sheet of paper, note pad or sticky label.

The smooth surface is perfect for visualising thoughts and ideas, effortlessly correcting and erasing as needed. At the end of a meeting or brainstorming session, it links individual ideas and notes with the bigger picture, as each personal board is clipped onto the larger team board. The timeless design is carried over into CAVE, the transport and display module which provides a secure home base for the glass boards. The streamlined design, clear functionality and tactile surfaces make CAVE, as well as Sketch Board, a true pleasure to use.

For technical information see page 50

# FURNISHINGS

CHAT BOARD® Wardrobe cleverly merges a functional and spacious wardrobe unit with a large, magnetic glass board.

For technical information see page 50

## *Wardrobe*

Continuing the clear, intentionally understated design aesthetics of the entire CHAT BOARD® collection, the signature glass board is here transformed into a stationary piece of furniture, lending a new dimension to its core purpose. Placed in a reception area, entrance hall or lobby, the Wardrobe is the perfect way to greet visitors or co-workers with a message of welcome, an illustration, or any kind of useful information. At home it will soon become an indispensable part of daily life, as a practical storage space and an unmissable place for sharing last-minute messages, shopping lists and notes of future appointments.

## *Magazine Rack*

Kill the clutter with the CHAT BOARD® Magazine Rack, our unique storage unit for all kinds of correspondence, documents, magazines, newspapers etc. Perfect for keeping all of those distracting desk piles at bay, the Magazine Rack is, with its writable glass surface, easily made personal, making it the obvious choice for open offices, common rooms and any other shared spaces. Designed by Peter Henriksen, it has a partly magnetic glass front and a specially designed steel frame, which makes it easy to mount several units together in succession.

For technical information see page 51

## *Table*

CHAT BOARD® Table is the functional meeting-, office- or dining table for creative spaces. The writable and erasable surface encourages the user to break conventions and get carried away, make notes, sketch and communicate ideas visually, directly on the table top, during the creative process.

## *A table for creative spaces*

## Print

For your customisation, we use a large-format flatbed digital printer technology for digital printing on glass. This unique solution enables endless creative possibilities of high quality designs for CHAT BOARD® products and an opportunity to disrupt the clear and bright wall surfaces in offices and other environments. Digital printing on the front and/or reverse side of the glass allows each panel to be designed individually.

We can print any template on the board, from a simple logo to complex planning systems, or even high-resolution photos.

## CUSTOMISED

Our products are available in a wide range of standard sizes and colours. We also specialise in custom production and are happy to accommodate any special wishes. On request, many of our products can be completely custom-made.

# ACCESSORIES

In addition to our main collection of products, we offer a wide range of accessories, specially developed to make the most of the CHAT BOARD® products.

*Off to  
a great start*

Each of our 9 different Starter Sets combines everything you need for a perfect beginning.

CHAT BOARD® Colours

# COLOURS

Colours have a unique ability to transform the look and feel of any room. Should you wish to have a colour created specifically for your surroundings, matching a company logo or a corporate design etc., our unique palette of 35 standard colours offers limitless combinations, and our products can also be ordered in any NCS or RAL standard colour available for glass.

# QUALITY & MAINTENANCE

CHAT BOARD® stands for quality, functionality and design. All of our products are European - developed, designed and manufactured in Denmark.

This assures that our high quality standards are maintained, and that everything is produced under conditions that respect our workforce, as well as our surroundings.

CHAT BOARD® has a long-standing policy of protecting the environment and conserving energy and natural resources. Our strategy has served the environment and our business well over the years, and it provides the foundation for the continued growth of our business. Durability plays an important role in the environmental consideration of a product. All of our products have long lasting durability due to the selected materials, glass and steel.

CHAT BOARD® products are virtually maintenance-free. However, we recommend using CHAT BOARD® cleaning products, such as our Erasers and Cleaner, after each use.

For CHAT BOARD®, manufacturing of sustainable products means intense pre-production development, where premium materials are carefully selected. The sustainable use of valuable resources is of paramount importance to us - from energy-efficient production through the sensible use of raw materials to recyclable products.

We aim to meet our customers' needs at the highest level. Therefore, all glass leaving our factory has been thoroughly inspected by two quality managers to prevent any defective products being shipped.

*The human eye  
is the best quality  
control*

All of our products are developed and manufactured in Denmark, which reinforces our desire to provide a superior product in terms of attention to detail and highest-grade materials.

## PRODUCTION

Our production staff places great importance on high quality standards and optimal production conditions. All products are assembled manually with the utmost care, and without the use of any robots. We work with attention to detail and believe that the human factor always remains essential. Arguably, the human eye is the best quality control, and that is why each product is manually inspected multiple times.

We carefully package our products to ensure optimal safety and durability during transport. To this end, we also cooperate with top service logistic partners, who are used to handling our freight with utmost care.

Finally, we put great emphasis on intensive pre-production development, whereby the best materials are selected for the final product.
